Special Tips

DTG: The amount of pre-treat used on fabric blends might differ of the amount used on 100% cotton.

SUBLIMATION: Best results on 100% polyester, use it preferably on white or light colors. Use 50% polyester blends or for vintage and faded prints. Always check temperature settings to avoid melting of polyester.

DECORATING TECHNIQUES

HEAT TRANSFER/ DIRECT TO FILM (DTF)

Both Heat Transfer and DTF techniques are heat-based methods ideal for detailed, colorful graphics. DTF's use of transfer film offers added flexibility and a soft, durable finish across various fabrics.

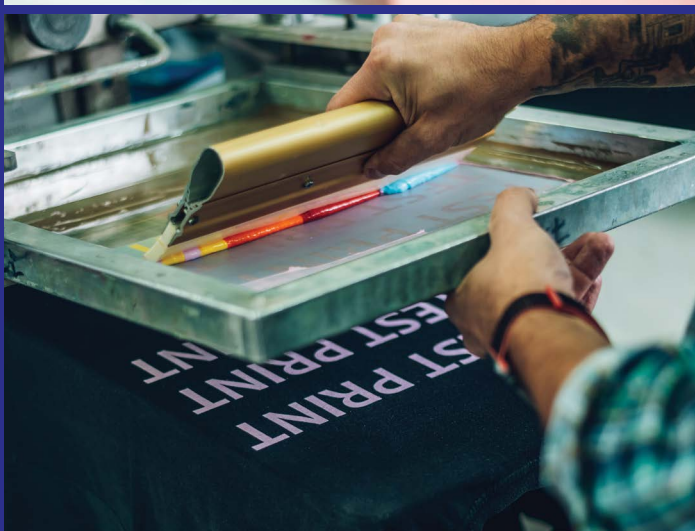

DIRECT TO GARMENT

Direct to Garment printing (DTG) is printing on textiles using inkjet technology which usually utilizes specialized water-based inks. DTG is particularly effective for short runs, full color printing, or for reproducing fine detail.

EMBROIDERY

Embroidery is sewing a design, text or logo onto a garment with special thread. This technique gives garments a higher perceived value and works particularly well on heavier weight garments such as fleece.

SCREEN PRINT

Screen Printing (Silk Screening) is a technique that uses stencils and ink to create designs on garments. It is the most economical method for producing large quantities that involve cotton or cotton-blend garments.
